

Drift Masters
European Championship
General Regulation 2021

Introduction

Since its inception in 2014, the Drift Masters European Championship (DMEC) has evolved from humble beginnings of a 3-round series on a small custom-built circuit to what is now recognized as the greatest drift championship on the continent with alliances across the globe. Year on year growth has not only seen driver numbers increase but also spectator figures, in attendance and online. We expanded the numbers of events to five in 2015, on to a constant six in 2016, 2017, 2018, 2019, 2020 and now 2021

DMEC as a championship has eclipsed and surpassed all expectations in such a short period of time but one trait has been constant throughout, professionalism. With the main nature of our business being high-speed motorsport, enforcing strict safety regulations from the offset will always be a core value to the DMEC team. When it comes to designing our drift venues, creativity is key. Each year brings the championship to new and exciting venues. From fully custom-built drift arenas constructed within professional football stadiums to taking over Formula One race circuits, DMEC has no boundaries. The championship itself may be based within the continent of Europe but it's reach and following spreads across the globe. Such is the desire to drive in the championship, the DMEC grid has featured drivers from the Europe, USA, Middle East, Asia and more.

2021 is set to be a record-breaking season after hard 2020 year with global pandemic on all fronts for DMEC and our team are ready to make the steps to finally become the biggest and best drift championship in the world and we're delighted to have you along for the journey.
